OFFERING # 7-A

CLEARANCE SALE OF CUT FLOWER STOCK *of orchid plants*Up to 50% Discount from Regular Prices Shown on Offering

During the past several years we have been building two new houses each year to take care of our increasing stocks. This year we are not building new houses, hence the urgent need for space for the fine new seedlings we have coming on.

We still have a thousand or more fine mature plants that were individually valued and offered for sale this year to balance our cut flower production. Although there are a few winter and spring bloomers included in this offering, the majority are summer and fall blooming plants. We do not have the room to carry these plants through the winter and spring and we must move them out at a sacrifice. If you have the room in your greenhouse to house the plants, this represents an opportunity to obtain flowering stock at rock bottom prices. A comparison of this offering with our previous offerings 5-A and 5-B will show many of these plants described and offered at these same prices from which we are now offering the discounts.

In placing your order please use the special order form that is enclosed. Otherwise the plants will be billed at catalogue prices. A 30% discount is offered under Plan No. 1 from prices given in the offering. A 50% discount is offered under Plan No. 2 from prices given in the offering. For the best buy we suggest Plan No. 2. We have only one plant of each number, and if we are not permitted to substitute, it involves correspondence and a delay in shipping should the plant of your choice be already sold. This is costly to us and disappointing to you so we are willing to allow an extra 20% reduction in price for the privilege of substitution. If you elect to use Plan No. 2 and the plant of your choice has been sold when your order reaches us, a substitution will be made as follows:

- 1 - Plants producing flowers of the same color will be sent or a substitution will not be made. We have a limited stock of yellows, whites and whites with purple lip and they will be sent as long as they last. Orders will be filled as they are received.
- 2 - Plants of the same value as those ordered will be sent if they are still available on the offering. However, we reserve the right to send plants of better quality if none of the same value as those ordered are available. If plants valued on the offering at \$12.50 or less are ordered, a \$12.50 limit on substitutions will be observed. If plants of \$15.00 or more are ordered, a limit of \$25.00 will be observed. Prices referred to are offered prices before the discount is taken.
